

Project Summary of the Successful FY 2023 Radon Testing and Mitigation Demonstration Applicants

Illinois

Applicant: Warren County Housing Authority

Requested Amount: \$600,000

Recommended Amount: \$600,000

Project Title: Radon Testing and Mitigation Demonstration for Public Housing

The Warren County Housing Authority is located in EPA Radon Zone 1, with the highest potential for elevated radon levels, and will be awarded \$600,000 to conduct radon testing and mitigation of building with units having radon levels at or above the EPA action level of 4 pCi/l. Radon testing will be conducted in 129 units, of which 127 are ground floor units. The Housing Authority plans to mitigate in 127 units. This figure was based on the results from radon testing that the Housing Authority completed between 2020 and 2021.

Tennessee

Applicant: Maryville Housing Authority

Requested Amount: \$446,122

Recommended Amount: \$446,122

Project Title: Radon Testing and Mitigation Demonstration for Public Housing

The Maryville Housing Authority will be awarded \$446,122 to conduct radon testing and mitigation of buildings with units at or above the EPA action level of 4pCi/L. The radon testing will be done in the following three properties: Parkside, Eastpark, and McGhee, which are located in EPA Zone 1, with the highest potential for elevated radon levels, and where 96% of the units in these properties are at the ground level. The project is expected to protect 275 residents.
